I have submitted herewith my application for membership and water service from West Medina Water Supply Corporation, along with my Grant of Easement and \$130.00 non-refundable study fee.

I understand that the system was not designed for my service and an engineering study will be needed to determine the conditions under which service can be offered.

I understand that if the system as currently constructed is adequate for my Service request, that I can obtain service after payment of the normal charges which presently are:

	<u>Short Side</u>	<u>Long Side</u>
Membership	\$100.00	\$100.00
Water Acquisition	6,700.00	6,700.00
Construction	1,200.00 (short side)	1,200.00 + Bore cost and any other expenses
Capital Recovery	<u>1,500.00</u>	<u>1,500.00</u>
Total	<u>\$9,500.00</u>	<u>\$9,500.00</u> + Bore cost and any other expenses.

I also understand that should the system be unable to accommodate my request, I will be advised as to what the estimated additional cost of required improvements is which would accommodate by service request.

I agree to complete the application for membership by paying all estimated fees to West Medina Water Supply Corporation no later than 60 days after being notified of the conditions under which service will be offered, if not, I will be subject to a new engineering evaluation and any fees associated with that new evaluation if I apply for a meter at a later date. I also understand that if I do not install the meter within 120 days of notification of approval, I will begin paying West Medina’s minimum monthly charge per meter for each approved meter. Failure to do so could lead to a cancellation of the meter(s) request and forfeiture of all collected fees.

The location of my 5/8” meter being requested is as shown on the attached drawing.

I have been advised concerning the Corporation’s Tariff Policies and agree to install, at my cost, the customer pressure regulator valve, check valve and cut off valve.

My proposed building site is not within a flood plain area as shown on F.E.M.A. maps.
